

Eco-safe driving is a recognized and proven style of driving that contributes to road safety whilst reducing fuel consumption and emissions.

One of the main factors in increasing road safety is the emphasis on planning ahead so that you are prepared in advance for potential hazards. By increasing your hazard perception and planning skills you can maximize use of your vehicle's momentum, engine braking and engine torque and, by doing this, can reduce fuel consumption and damage to the environment.

Always try to use the vehicle controls as smoothly as possible, with attention to: Starting and moving away, accelerating, using gears, driving at an appropriate speed and braking as this reduces the wear and tear on the vehicles and helps reduce carbon dioxide (CO₂). This also saves the company money on repairs, fuel & other costs.

Please also ensure that vehicles are not left running on idle for any periods of time of which you are stationary, such as loading and unloading, whilst waiting in traffic for long periods of time and other periods of time when the vehicle has no need to be running idle. This is in line with the environmental legislation.

CP Transport Solutions LTD have already cut down on wasted engine idling when drivers are setting up sat navs, phones and paper work in the morning before setting off on their journey.

Failing to adhere to these above rules and guidelines could lead to disciplinary action. (including dismissal whether with or without notice or payment in lieu).

NOTE: CP Transport Solutions LTD is always taking steps to cut down on emissions and waste of fuel, this is simple task that can be put into practice easily with benefits to everybody involved. Moving forward in an eco-direction will require co-operation from all employees.

Failing to adhere to these rules will lead to disciplinary action or termination of contract.

This policy will be kept under review to ensure that it continues to meet its aims.

This policy applies to all employees of CP Transport Solutions LTD.

Signed

Daniel Peach – Company Director
